Dear Public Service Commission,

Duke should quit investing in dirty, old energy like coal and nuclear, and actually invest in the cheaper renewable technologies its executives claim to support. I want the Carolinas to be more energy efficient and powered by local wind & solar that will employ thousands of Carolinians.

Sincerely,

Lucinda McGuinn

Dear Public Service Commission,

Coal not only pollutes the air, but also our rivers and lakes. I live right next door to a Toxic Ash waste disposal site that is leaking toxic heavy metals into the French Broad River.

Duke should quit investing in dirty, old energy like coal and nuclear, and actually invest in the cheaper renewable technologies its executives claim to support. I want the Carolinas to be more energy efficient and powered by local wind & solar that will employ thousands of Carolinians.
